

## Highway D (Main Street) Project

### ***Welcome***

Welcome to the public information meeting for the proposed reconstruction of Highway D (Main Street) in the Village of Belgium. The project begins approximately 200' west of Lilac Lane and extends easterly to approximately 150' west of Highway LL. We appreciate your attendance and interest in the project. The meeting will be held in an open-house format, with a brief presentation scheduled for 5:45 pm.

This handout and the exhibits on display are available to help familiarize you with the project details. We encourage you to review the exhibits. Representatives from Ozaukee County, the Village of Belgium, and Gremmer & Associates (design team) are here to receive comments and answer any questions you may have about this project. In addition to this handout is a sheet for your written comments and concerns about this project. You may drop your comment form in the comment box at the registration table tonight, or return by mail as noted on the form. We ask that all comments be returned by April 6, 2015.

### ***Purpose and need***

The primary purpose of the project is to address the deteriorated pavement along Highway D.

### ***Proposed improvement***

The proposed project consists of reconstructing the existing roadway with a new urban roadway, including curb and gutter, sidewalk, street lighting, and storm sewer.

The exhibits on display at today's meeting depict the preferred roadway layout that was developed based on discussions with Ozaukee County and Village of Belgium officials and staff and feedback received during the first public information meeting.

The roadway layouts are broken up into three main "segments" of Main Street as follows:

- West Village limits to Elevator Lane
- Elevator Lane to Oak Street
- Oak Street to Highway LL

The design for the west and east segments of the project includes restricting parking to the north side of the road. The middle segment (Elevator Lane to Oak Street) allows parking on both sides of the road.

On-street bicycle accommodations are included throughout the project.

The roadway sections are shown on the back page of the handout.

## ***Right-of-way & Easements***

Temporary easements will be necessary throughout the project to grade back into the properties behind the sidewalk. In addition, minor amounts of permanent right-of-way may need to be acquired at some select locations. The conceptual proposed right-of-way and temporary limited easements are shown on the displays and more detailed information concerning right-of-way acquisition will be provided at a later date.

## ***Access during construction***

More detail concerning traffic staging and/or detours will be provided at the next meeting, however access to adjacent businesses will be maintained at all times. The proposed detour will be CTH LL to CTH A to STH 57.

## ***Section 4(f) Properties***

The Federal Highway Administration (FHWA) has regulations governing the use of land from publicly owned parks, recreation areas, wildlife and waterfowl refuges, and public or private historic sites. These sites are called Section 4(f) properties. The Belgium Community Park, which is adjacent to the project, is a Section 4(f) property. In addition, the properties at 814 Main Street, 775 Main Street, and 535 Main Street have been identified as being eligible for the National Register of Historic Places (NRHP) listing.

## ***What's next?***

Upcoming project activities before the next public information meeting:

- Review input received at tonight's public information meeting
- Continue to coordinate with Ozaukee County and Village of Belgium officials and staff
- Refine design and determine right-of-way and easement needs

## ***Project timeline***

The project is currently programmed for construction in 2018. The design team will continue to refine the design after today's meeting.

## ***Contact information***
